

T8 LED Lamps

Com Lite LED T8 lamps are ideal as a replacement for traditional fluorescent lamps. They have a good life expectancy and are manufactured only with quality components to ensure reliability and safety.

- Com Lite smart versions have inbuilt microwave sensors which will switch the lights off automatically after 6 minutes of non-occupancy. These are suitable for installation inside plastic or open fixtures only.
- Driverless tubes can be matched with our European branded LED drivers to operate as 1-10v /DALI/ Push dim or simply on a Com Lite emergency inverter. This flexibility gives the user the chance to design a lighting fixture that suits their needs.
- 4000k and 6500k available in all sizes
- ELED and driverless range 2 year warranty
- All other tubes 3 year warranty
- Drivers supplied with LED1500/28WF 5 year warranty
- ELED range working temperature -20 to +40°
